My dear Mr. Johnson:

Your plants are all good things.
The Silene is S. parishii as you say. The
orchid is Limnorchis sparsiflora some-
times called Holcueria sparsiflora, and
the composite is Chrysanthemum
occidentale.

I shall include all of them in
my revised Los Angeles flora which
I shall soon send to press.

Mr. Parish tells me of your
rediscovery of the long lost Cladium
I have scratched it from our list of
plants.

You will be interested to know that
we have purchased the Parish herbarium
and that. Hooker is going to publish
an Illustrated Flora of the Pacific Coast.
Keep the good work up - there is lots to
be done in Southern California yet
H. R. Robinson.
